## Genuine Hand Made Corozo Nut Rings from Porto Rico

A unique and novel souvenir from tropical PORTO RICO—America's island possession in the West Indies. The Corozo palm grows in Porto Rico. Clusters of the nuts of this tree grow in huge husks. They are shelled by machinery, and when dried by heat, they closely resemble ivory; indeed the nuts are sometimes called Vegetable Ivory. From this material, which is easily dyed to any color, many products, including jewelry, buttons, etc., are made. Diligent natives gather the choice nuts, and skillful natives then spend painstaking hours carving the rings from the hard nut. After ring is carved out, the inlaid imitation pearl heart is embedded in ring. Finally, polished until it has a beautiful, permanent walnut-like appearance. In Porto Rico, the Corozo Nut Ring is considered a token of good luck and even regarded sacred among lovers, and it often takes the place of an engagement ring. Specify your finger size when ordering.

### Tear Gas GUN

**Protect Yourself With This Easily Carried Gun**

The Tear Gas Pistol offers a safe method of protection for burglars, hold-up men and other forms of attack. The Tear Gas Pistol is a weapon of self-defense and has the endorsement of leading law enforcement authorities all over the United States. The weapon does no permanent injury, but renders the assailant ineffective so that he may be easily captured. Fire the Tear Gas Pistol without fear of injuring innocent persons. The result is that while an average person would hesitate to fire a revolver for fear of hurting an innocent person, with a Tear Gas Pistol you can take decisive action without worry.

**What Is Tear Gas?**

Tear Gas is a non-poisonous gas that renders the victim helpless. It irritates the tear ducts of the eyes. The assailant drops everything and instinctively covers up his eyes. He is helpless and unable to see for 1/2 to 3 hours, depending upon size of shell and distance at which it is fired. Pistol is constructed so that person using it is safe from its effects. Direct hit not necessary. Gas spreads out as it leaves gun so that if any are taken at all it is practically impossible to miss.

This is an all purpose weapon. Can be carried on your person, kept in desk, etc., without exciting suspicion. Yet it is ready for instant use. Weighs only 2 ounces. Standard pencil size as shown in illustration which is approximately actual size. Fitted with a mechanical pencil unit so that it may be used as an eversharp pencil. Loads and fires a .38 caliber tear gas shell. The gas is shot out to a distance of 15 feet and immediately begins to spread even further. While its all metal construction and precision workmanship is comparable to that of a fine firearm, it cannot be classed as a dangerous weapon. Bullets cannot be fired from the tear gas gun. Carry in pocket like an ordinary pencil. Safety catch near firing pin prevents accidental discharge. Handsomely nickel plated. Length 5 1/2-in. Motorists, campers, hunters, gas station attendants, storekeepers—everyone ought to welcome this low-cost, dependable protection. Not available. Shipped by Express. Shipping Charges Extra.

Phonograph Pick Up—Microphone—Telephone—Detectaphone  
Amplifying Mike, Etc., Etc., All in One Unit!

## Sensitive Microphone Button

Hundreds of Practical Uses—Wonderful For The Experimenter!

### A FEW OF ITS MANY USES

Although the Microphone Transmitter Button is an amazingly practical unit, it can be used for numerous experimental and novelty effects. Just a few of the many uses are outlined below. Many new uses will occur to you as you experiment with it.

### FOR THE ELECTRICAL EXPERIMENTER AND INVENTOR

Here is a practical unit that every experimenter should have. When connected into the appropriate circuit it is useful in making recordings, picking up and amplifying noises such as the noises of insects, overhearing conversations and music in other rooms and remote places, for creating weird and unusual sound effects, for constructing your own wireless transmitter, sending voice through water, etc., etc.

### BROADCAST THRU YOUR RADIO

You can use this as a radio mike. When connected to your radio, you can talk, sing or play through the loudspeaker of your radio.

### OVERHEARING CONVERSATIONS

The pick-up button is so small that it can be easily concealed in a lamp, bowl of flowers, etc., so that it can be used to pick up conversations, etc., that you wish to overhear.

### AMPLIFYING UNIT

When used with radio or loudspeaker system you can use it to amplify music, talking, etc. Can be concealed in lapel of your coat.

### WEIRD MAGICAL EFFECTS

The magician will find this a useful instrument to aid him in doing some very mystifying tricks, such as the "Talking Glass," etc.

### MIND READING STUNT

Has been used for operating the mind reading act. A concealed microphone in the lapel of assistant's coat enables mind reader to overhear the questions put to him.

### CREATING SPIRIT PHENOMENA

Because this microphone is so easily concealed, it has been very handy to spiritualists in creating novelty effects that bewilder their audiences. It will pick up insignificant noises such as the ticking of a watch, etc., and you can amplify them through your radio.

### MAKE ELECTRICAL STETHOSCOPE AND TROUBLE FINDER

The electrical stethoscope is one of the most useful tools that has been discovered. It is of particular use in locating troubles in machinery, autos, motors, watches, leaks in pipes, etc. The sensitive part of the stethoscope is the exploring rod which picks up regular sounds in the parts of machinery and amplifies them so you can hear them. Troubles that would ordinarily go unnoticed or be almost impossible to locate can be quickly found. Make your own with this button.

### MAKE YOUR OWN ELECTRIC MUSICAL INSTRUMENT

Attach the sensitive Microphone Button to guitar, banjo, violin, clarinet, or other musical instrument to obtain many fascinating and beautiful effects. The popular electric singing guitar is produced by means of a pick-up of this kind.

Among many electrical experimenters the button has created a sensation. It is not uncommon to receive unsolicited letters like these: "I received transmitter button today and I wish to inform you that it works great and is the best I have ever seen or heard of for the price. I will certainly recommend it."

"I have been using one of these transmitter buttons, and it has proved to be worth more than its value in my experimenting."

"I received one (Transmitter Button) some time ago, and it is just O.K. for experimenting." "I have been using one of these transmitter buttons for experimental work and it certainly lives up to all you say for it and then some."

Mr. H. Gernsback of the Electrical Experimenter, said to be dean of electrical experimenters, said: "In the writer's opinion, obtained by actual elaborate tests the Super-sensitive Transmitter Button is probably the most efficient device of its kind on the market today, due to its simplicity and other outstanding features. Should have a great future."

SO LOW IN PRICE  
YOU SHOULD  
ENJOY ITS MANY  
USES NOW!

### KNOWLEDGE VALUABLE

What others have done you should be able to do. This is the day of electrical experiments and electrical novelties. Never before was knowledge of electricity and transmission so valuable.

Easily connected and easily operated. You don't have to know "all about" electricity to hook it up. A boy of 13 could do it. Button comes with booklet of instructions and hook-up diagrams showing its many uses.

**RADIO FOR BEGINNERS**  
Hugo Gernsback, the internationally famous radio pioneer, author and editor of the famous "SHORT WAVE" and "TELEVISION" magazines, is ready to lead you to a triumph with this new book. Any beginner who reads it will get a thorough ground work in radio theory. Clearly explained in simple language, and through the use of many illustrations. Analogies are used to make the mysteries of radio as clear as "2 plus 2 is 4." It also contains diagrams and instructions for building simple radio sets, suitable for the radio beginner. More advanced radio men will be interested in learning the derivation of formulas, and the many other interesting facts. 32 pages, well illustrated throughout, 15000 words.

**HOW TO READ RADIO DIAGRAMS**  
All of the symbols commonly used in radio diagrams are presented in this book, together with pictures of the apparatus they represent, and explanations giving an easy method to memorize them. This book is written by Elmer Berg, the well-known radio writer and member of the editorial staff of "RADIO-CRAFT" magazine, also contains two dozen picture wiring diagrams and two dozen schematic diagrams of simple radio sets that you can build. Every diagram is completely explained in language which is easily understood by the radio beginner. More advanced radio men will be interested in learning the derivation of formulas, and the many other interesting facts. 32 pages, well illustrated throughout, 15000 words.

**ALL ABOUT AERIALS**  
The demand for a low priced book explaining in a clear, lucid manner the principles underlying the design and installation of efficient aerials has become a crying need. Furthermore, the steadily increasing nuisance of man-made static, resulting in noisy radio reception—particularly in connection with short-wave receivers—has made the importance of a good antenna a paramount issue. In simple, understandable language this book explains the theory underlying the various types of aerials: the inverted "L," the Doublet, the Doublet Doublet, etc. It explains how noise-free reception can be obtained, how low-impedance transmission lines work, why transposed lead-ins are used. It goes into detail on the construction of aerials suitable for long-wave broadcast receivers, and for all other types. Profusely illustrated in a manner which will appeal to the most inexperienced in radio; clear, self-explanatory; it is written in a simple style.

# The Mirroscope or Projecting Lantern

**PROJECTS POST CARDS OR ANY PRINTED PICTURES, SHOWS GREATLY MAGNIFIED VIEWS OF OPAQUE OBJECTS UPON SCREEN**

The Mirroscope is a great improvement upon magic lanterns because you have an **unlimited supply of pictures** free of cost. Post-Cards, photographs, engravings from illustrated papers and, in fact, any opaque object, such as moving works of a watch, living insects, and so on, can be projected upon the screen in exactly the same manner as the transparent slides in a magic lantern. With the Mirroscope you can have a **REAL PICTURE SHOW**. You can bring out the pictures you took last summer of the camp, of that canoe trip, and the photos taken at school, and throw them on the sheet and look at them just as long as you want. You can show all of the post cards collected on your automobile trip last summer. And you can take Mother and Father by surprise, too. You can dig up the old family photos, call the family in and take them all back a few years by showing them the pictures of their youth. You can have regular evening at home, in which the whole family can be together and share the real pleasure of a Mirroscope with you. And the beauty of it all is that it **COSTS NOTHING TO SEE NEW PICTURES**. It is unlike the old magic lantern or even the more modern moving picture machine where you are forced to continually buy new slides or film in order to see anything different. Not so with the Mirroscope; you can show the photos taken by yourself or friends, colored postal cards, illustrations from books, etc., each being beautifully and exactly duplicated on the sheet before you. It is interesting and it can be very instructive. All Mirrosopes are equipped for use on your existing electric light current. You simply screw in the plug into any electric light socket and it is ready for **IMMEDIATE USE**. Where electricity is not available, you can use any form of illumination that may be available, such as natural or artificial gas or acetylene lighting system, or even a flashlight or small portable lamp will make a reasonably satisfactory substitute.

This is not a pretty object, but there is fun in it for people who like practical jokes. The Ghost when displayed in a perfectly dark place, glows with a ghastly cold bluish radiance, very apt to give one a "creepy" sensation even when you know all about it, but a regular scare for those who come upon it unexpectedly. Full length.

## Print Photos Anywhere

With This Chemical! Produces the picture in a rich brown or sepia tone, instead of the black and white. Many actually prefer the brown finish, although black and white is undoubtedly more popular. It is easy for you to print your snapshots on cloth, metal, glass, handkerchiefs, etc.

## LEROI MYSTIC Makes A Picture or Photo Temporarily INVISIBLE

This is a very peculiar preparation called Leromystic, with which you can make your photographs invisible. Leromystic consists of a set of four chemicals, with which you can produce two solutions. The first solution will render any photograph completely invisible. The picture will then remain invisible until treated with the second solution. Thus you can apparently make a picture disappear, and then reappear some time later. You can send portraits, etc., that will apparently be nothing but blank paper, to your friends, yet all they must do to bring the image back again is simply to soak the photo in one of the solutions, as per directions, until the picture returns! The solutions are good for many photos, and will keep almost indefinitely.

No. 4015. LEROI MYSTIC. Price Postpaid 50c

## Color Your Snapshots

Photo Coloring Set CONVERT YOUR BLACK AND WHITE PRINTS INTO BEAUTIFUL COLORED PORTRAITS! It's easy, it's fun. Colors are transparent and look natural. Can be applied to any finish print, including glossy prints. No experience is needed. Because the photograph defines the outlines and the colors merely add to the picture, the sharpness of the picture is not affected. Includes 8 colors and color brushes.

## BUILD THIS 2-Pass. Midget Road Car

This was not designed to be used on race tracks, but it is swell for knocking around the country and makes an excellent runabout. Perhaps the only objection to the other midget runabouts is the fact that you can't take a friend along—well, no more lonely rides in this job. It retains all the midget principles, right down to the neat appearance and speedy motor. It is a rather simple construction, yet it is a genuine automobile. Do not confuse these blueprints with those of the one-passenger Runabouts. This is a genuine auto in midget.

Uses two cylinder Harley Davidson motor, Model T Ford rear axle and torque tube drive.

No. 1794. Two Passenger Midget Road Car Blueprints. Price Postpaid..... \$2.25

How would you like to build this De Luxe Midget Runabout? Here is a set of 4 blueprints for building a swell little runabout with a nicely finished body. This car has a 58 inch wheel base and a 28 inch tread. Uses same type of motor as employed in the Pushmobile—about 34 horsepower of the washing machine type. The car will deliver about 15 to 20 miles per hour.

The blueprints come in a set of four with every detail given clearly and completely so that you can build the car with a minimum of trouble. The plans are not difficult to obtain, and the total cost is very reasonable.

No. 1793. Midget Runabout Blueprints..... \$1.25

The recipe for this fish lure is said to be based on a formula more than 50 years old. The basic ingredients were used by pioneers, for contrary to general belief, there was not always "good fishing" in the "good old days." Fish lure is used for two purposes: bait or the lure can be thrown into the water in an effort to attract fish to your hook. Of course, there are different types of fish lure, but we believe this is one of the most successful. It is a recognized fact that fish can sometimes be caught with fish lure when they seem to absolutely refuse to bite on untreated bait. Full directions with each package. Shipped Postpaid.

## Secrets of the Psalms

Believed Found in a Cave on Mt. Sinai

By Godfrey Selig, Lecturer

Believed to be the original translation of this book from the German. It is supposed to be a fragment of the Practical Kabala, with extracts from other Kabalistic writings as translated by the author. (Thoughts hidden by Moses.) A legend about this book says, "That this was given Moses on Mt. Sinai when he descended he saw the Hebrews breaking their vow. He hid it away from them in a secret cave on Mt. Sinai—for he is supposed to have said, that if his people could not be trusted, then they dare not have so powerful a work." The book gives the so-called Proper Psalm to say for any condition, what Holy Words to say with it to receive its fulfillment. The book strikes at the very Heart of Kabbalesta writings. Brief table of contents: Psalm for Luck; Psalm for Court Cases; Psalm for overcoming enemies; Psalm for success in business; Psalm to overcome an evil spirit; Psalm to stop fear and persecution; Psalm to turn sorrow into joy; Psalm to keep secret from evil; Psalm to keep all misfortune away; Psalm for love; Psalm for jobs, etc. **49c**

"It's easy when you know how!" Written by a New York certified public accountant who has taught his system to thousands of bookkeepers. # \$1.50 Gazing Ball

IMPROVED, NEW TYPE GAZING BALL AT LESS THAN HALF THE PRICE IMPORTED CRYSTALS SOLD FOR! EVEN MORE PERFECT IN SHAPE! COMPLETE, MOUNTED IN STAND, \$1.50!

Crystal Gazing is not a new invention, nor is it merely a fad for foretelling the future or development of the mental powers. It is said to date back almost to the scriptural account of the creation of man. It is generally assumed that crystal gazing had its origin in Egypt and historians tell us that a large number of crystals were found in the ruins of an old temple in existence six thousand years before the Christian era.

Crystal gazing achieved great popularity in the British Isles during the Fourteenth Century. In Japan many homes have their crystals that they are said to consult on subjects of importance. The practice of crystal gazing has been prominent in Fiji, also in Mexico, Peru and other South American countries, India, Arabia and elsewhere. The art is said to be practiced extensively by the Yogis and Sunnecases as part of their religion.

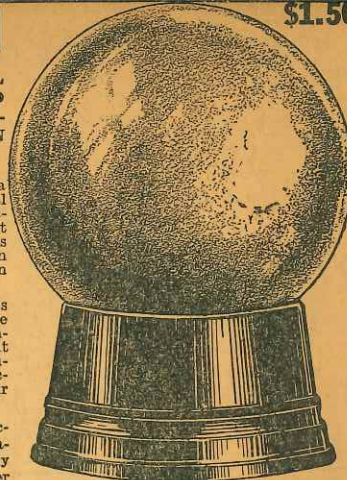

It seems difficult not to recognize its aid as a means of concentration, and concentration not infrequently means success, or to put it another way, success often requires concentration, but the student who earnestly desires to develop the mental powers might do worse than obtain a crystal, retire to a quiet semi-dark room and placing the crystal upon the table, gaze calmly at it and cause the mind to enter a passive state.

And now, through a special request, a U. S. manufacturer has made up a new type Gazing Ball for us, with many improvements, yet actually selling for only a fraction of the price the imported Gazing Crystals brought. Even the finest Gazing Crystal was seldom perfect and without flaws—most of them were not even round.

This new type of crystal is liquid-sealed, insuring absolute clearness, without flaws of any sort. Its shape is nearly perfect, spherical. As a result of modern methods of manufacture, the price has been considerably reduced. Each ball is mounted right into the stand and the stand is included in the price.

Ball is nearly 3-in. in diameter, stands nearly 4-in. high. Has attractive black composite bakelite base. At this bargain price, you should order NOW! No. 3994. GAZING BALL. Price Postpaid. . . . . \$1.50
